

# HOSTILE ENVIRONMENT & ADVANCED DRIVING TRAINING

**PREPARED BY**  
Chris Vosper - V-FORCE

## INTRODUCTION

V-FORCE brings together the expertise of specialist former-military and security operators, and professional racing and rally drivers to provide world-class advanced driving training.

Our training focuses on vehicle dynamics skills development, preparation and threat mitigation for operating in a hostile environment, and other specialist roles.

## V-FORCE TEAM

The V-FORCE team consists of carefully selected subject-matter experts with a range of highly specialised skills and expertise who have considerable military, security, motorsport and advanced driving backgrounds.

## TRAINING ENVIRONMENT

Our main operating base, Walters Arena in South Wales, is a 4000 acre site comprising an enormous gravel skid-pan, numerous gravel tracks, off-road areas and technical sections offering an unparalleled training environment.

We operate a multi-vehicle fleet with every relevant vehicle type represented. Our infrastructure consists of classrooms, a hospitality area and a purpose-built tactics compound.

## TRAINING METHODOLOGY

At the core of the training is a solid understanding of the theory and practical application of vehicle dynamics, to become a safer, more accomplished driver. Once the trainee has mastered the fundamentals of car control in a number of different vehicle types, they will progress towards developing these skills for specific situations and threats.

Finally, we pressure-test the full suite of skills learnt throughout the course to ensure they become second nature and can be called upon whenever they are required, no matter the situation.

## HOSTILE ENVIRONMENT DRIVING TRAINING

One of the largest threats posed by operating in a hostile environment are road traffic accidents or collisions. V-FORCE's HEDT courses will help prepare trainees for the potential challenges they might face while driving under the stress of high risk operations, equipping the participants with the skills to reduce the likelihood of being involved in a road traffic accident or collision.

## COURSES

V-FORCE delivers a range of comprehensive training courses, as detailed below, but we can also tailor the content, delivery and location of the instruction to meet the specific needs of the client.

**Vehicle Dynamics Fundamentals:** 2-day course to develop driving skills for Close Protection Operators and the wider security industry

**Hostile Environment Vehicle Training Foundation:** 3-day course to teach the key principles of vehicle operations in high-risk areas

**Hostile Environment Vehicle Training level 1:** 5-day course comprising the two previous courses

**Hostile Environment Vehicle Training level 2:** 5-day advanced training building on the skills of the Level 1 course

**Hostile Environment Vehicle Training Refresher:** Training to ensure the operator's skill level is suitable for deployments to hostile environments

## BESPOKE TRAINING

We are able to provide a wide range of vehicle training thanks to the adaptability of our superb staff, and our vast training area at Walters Arena. Our venue offers a wide range of different terrain at our disposal,

thereby affording us huge scope to partner with other training providers who can deliver non-driving related specialist training.

## ABOUT V-FORCE

V-FORCE was founded in 2014 by Chris Vosper, a highly trained and decorated military pilot and Army Officer, with a wealth of knowledge and experience. He flew numerous operational missions as a pilot and mission commander whilst in the hot seat of the AH-64 Apache Attack Helicopter, the world's most lethal and advanced attack helicopter.

Chris is passionate about motorsport and holds both BARS Rally and ARDS Racing Instructor qualifications. He formed V-FORCE to deliver world-class training in niche skills drawn from the best elements of specialist military training and cutting-edge motorsport instruction.
